Power consumption:	1870 W	Weight:	378.09 lb
Voltage / Frequency:	100-240 V / 50-60 Hz		

Product information

Making cardboard chips for packaging and filling material. The cardboard chips stabilize the goods in the package, fill up empty spaces and cushion impacts - and all that without plastic.

Integrated connection for dust suction (dust extractor optionally available).

The cardboard chips are dispensed from the back of the machine.
