HSM HL 7009

HSM HL 7009 horizontal baling press

This very compact, horizontal working counter plate press is suitable for large disposal tasks in retail and in small to medium central storages. The bales from a HL 7009 have a cross-section of 1100 x 1100 mm and a bale length of 1200 mm up to 600 kg in weight and therefore achieve an optimum HGV capacity. With the large bales from the HL 7009, you also save on handling expenses. The integrated hydraulic lifting/tilting device significantly reduces the number of people required to compact the recycling material.
