

## HSM V-Press 860 S

Das Modell HSM V-Press 860 S ist für die Verdichtung von Hartkunststoffen (z. B. Monitor- und TV-Gehäuse) sowie expansiven Kunststofffolien konzipiert. (Andere Materialien auf Anfrage.)

### Technical data

<b>Order number:</b>	6048614	<b>Pressing power:</b>	434 t
<b>Maximum bale weight:</b>	230 lb	<b>Width x Depth x Height:</b>	1868 x 1076 x 2985 "
<b>Loading aperture (WxH):</b>	1195 x 650 "		

### Product Information:

Reinforced press chamber and hydraulic door lock - Convenient opening and closing, no manual effort required

Automatic start of the pressing process after closing the door

Convenient membrane keypad with text display, which shows the current status of the machine

The HSM V-Presses are highly energy efficient thanks to the rapid stroke technology. This saves time and money

Robust mechanical bale ejector chain

Massive press ram and extremely robust press plate guidance

Double quantity of retaining claws optimize the compression of the pressing material and reduce the number of loading actions

HSM TCS (Torsion Control System) for monitoring press ram movement

Strapping with wire - optional tape station available for strapping with polyester tape or wire according to requirements
