Product Information:

The full bin is indicated via the display and the machine switches off automatically.

The paper feed with overload protection reduces paper jams and sustains the high throughput of paper.

The operation is very easy: the device starts automatically when fed with paper and automatically stops after shredding is complete.

The powerful motor ensures a high cutting capacity and reliable continuous operation.

The integrated stand-by feature reduces energy consumption when the document shredder is not in use.

The waste container can be easily removed and emptied.

For convenience, there are castors on the document shredder so it is easy to move around.

User safety is paramount. A slight pressure on the safety element immediately stops the paper feed and prevents unintentional entry into the machine.

The induction-hardened, solid steel cutting rollers with a lifetime warranty can easily cope with staples and paper clips and guarantee durability.
