HSM SECURIO P40i - 5.8 mm

Powerful data destruction with a high throughput performance. This document shredder impresses with its innovative IntelligentDrive motor and touch screen operating panel. Perfect for large working groups of up to fifteen people.

Technical data

Order number:	1881121	EAN:	4026631058056
Cutting type:	strip cut	Cutting size:	1/4"
Security level (DIN 66399 / ISO/IEC 21964):	E-2|O-2|P-2|T-2	Cutting capacity in sheets 80g/m²:	56 - 58
Noise level (idle operation):	ca. 55 dB(A)	Intake width:	12.99 "
Container volume / collecting:	38.3 gal	Collection volume in sheets:	954
Power consumption:	1300 W	Voltage / Frequency:	100-240 V / 50-60 Hz
Width x Depth x Height:	22.83 x 21.65 x 40.16 "	Machine weight:	147.71 lb

Product Information:

The high quality materials and proven HSM "Made in Germany" quality guarantee you are receiving a safe and durable machine.

The full bin is indicated via the display and the machine switches off automatically.

The powerful motor ensures a high cutting capacity and reliable continuous operation.

In stand-by mode, intelligent control programme EcoSmart ensures there is an exceptionally low power consumption of 0.1 watts.

After opening the door, the reusable collecting bag can be easily removed and emptied.

The document shredder has a sturdy cabinet with a wooden floor and an extra-large door opening angle which facilitates removing and replacing the collecting bag.

The innovative IntelligentDrive motor and operating technology offers three operating modes. Either for a particularly quiet, normal or a up to 40 % higher performance data destruction.

Due to the intelligent paper jam prevention feature, the system recognises automatically and quickly whether too much paper has been fed in. The machine goes into reverse or increases the power temporarily and pulls the paper in.

Reusable cardboard box as bin for shredded material.

The quiet operating mode minimises noise development in the workplace which is an important consideration for your staff.

User safety is paramount. A slight pressure on the safety element immediately stops the paper feed and prevents unintentional entry into the machine.

The operation is very easy: the device starts automatically when fed paper and automatically stops after shredding is complete.

Intuitive operation and multi-language menu selection via the high resolution 4,3" touch display. Relevant information such as operating modes and status reports are displayed. Consumable material, machine and contact details can be called up.

The induction-hardened, solid steel cutting rollers with a lifetime warranty can easily cope with staples and paper clips and guarantee durability.

The filling level of the waste container can be seen at all times through the inspection window.
